9.Experiment: AI-Assisted Features & Zia Analytics in Zoho Creator

Aim:

To explore and configure built-in artificial intelligence capabilities (Zia) and advanced analytics features within Zoho Creator for intelligent data querying, predictive forecasting, and automated insights.

Overview:

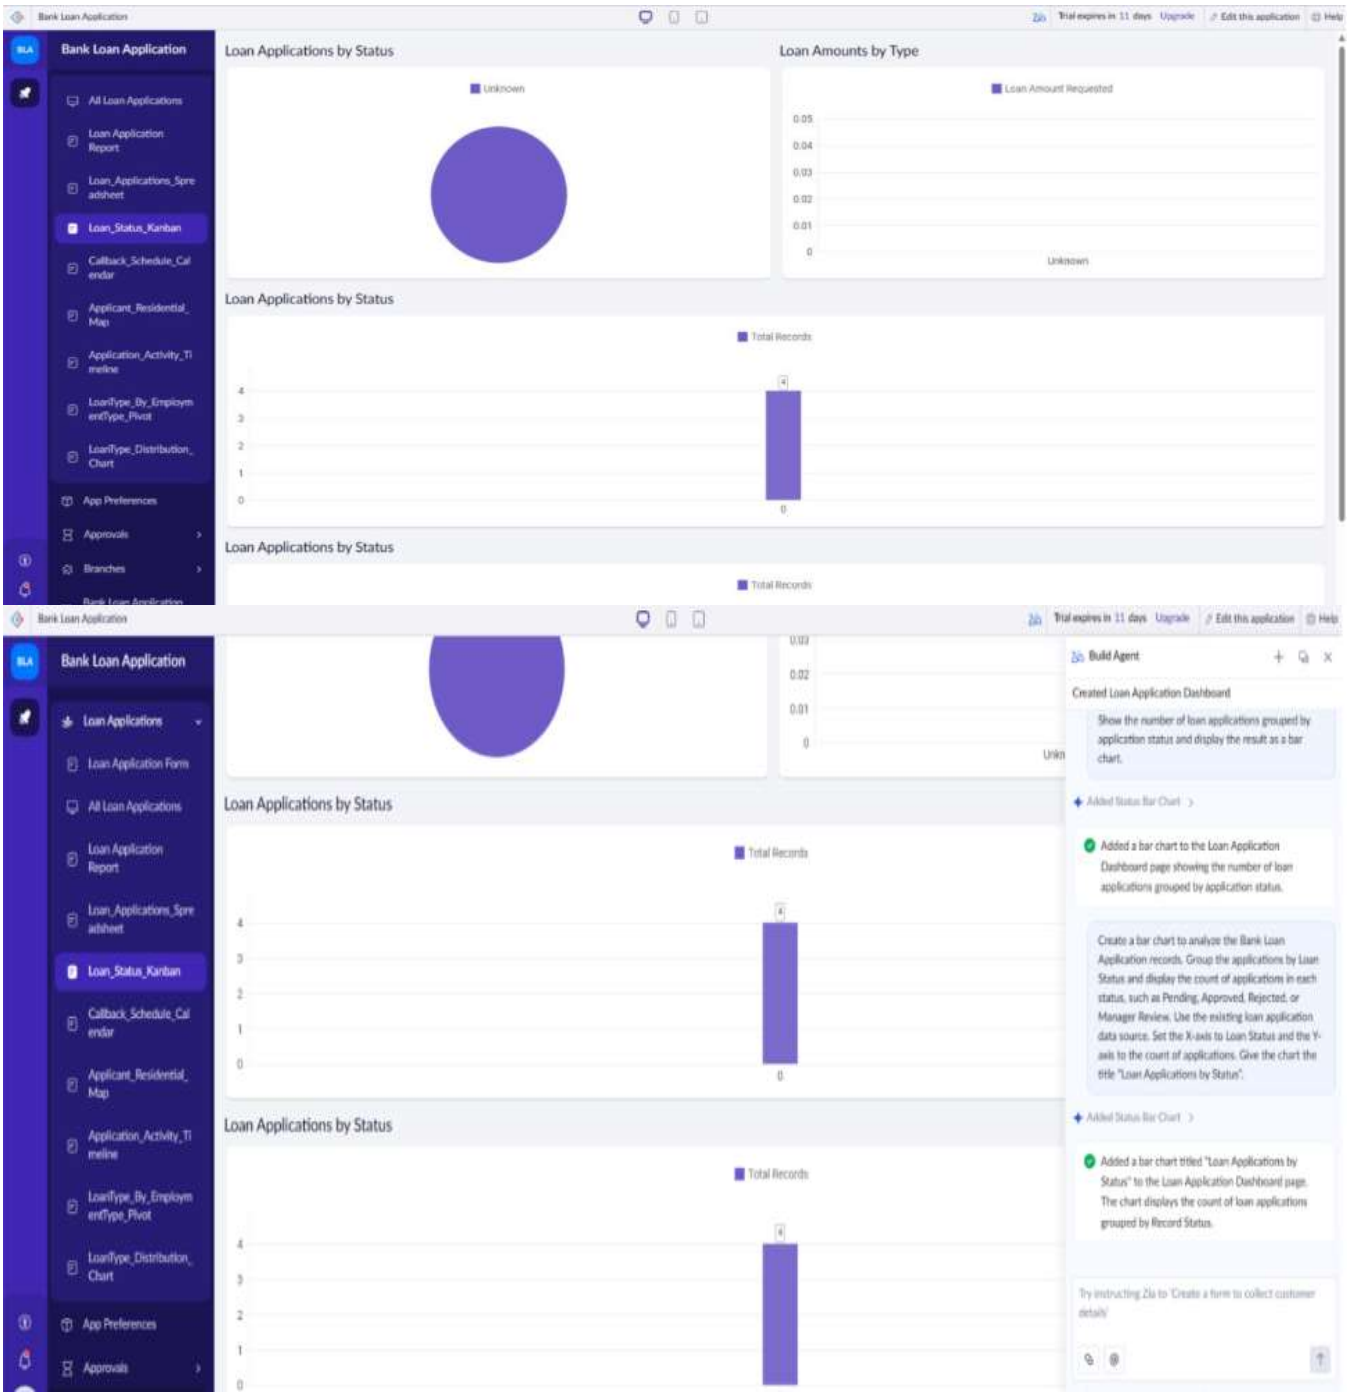

Zoho Creator integrates Zia (Zoho's conversational AI and analytics assistant) to empower low-code developers with natural language processing, automated chart creation, anomaly detection, and predictive analytics.

Feature / Capability	Functional Description in Zoho Creator
Zia Voice & Chat	Allows users to query application data and trigger reports via conversational commands.
Smart Analytics	Automatically suggests metrics, pivot tables, and visual charts based on dataset patterns.
Anomaly Detection	Flags irregular data entries, performance delays, or transaction spikes using machine learning.

Procedure:

1. **Enable Analytics & Zia:** Open your Zoho Creator application workspace, navigate to the *Analytics* module, and ensure Zia AI assistant integration is active for your target data tables.
2. **Generating AI-Driven Dashboards:** Use the natural language query prompt box to type commands like *"Show total revenue grouped by month as a bar chart"* or select Zia's automated dashboard recommendations.
3. **Configuring Predictors & Insights:** Set up data prediction models to forecast future trends based on historical application records (e.g., project completion dates or order volumes).

Build Agent
Created Loan Application Dashboard
Show the number of loan applications grouped by application status and display the result as a bar chart.
Added Status Bar Chart
Added a bar chart to the Loan Application Dashboard page showing the number of loan applications grouped by application status.
Create a bar chart to analyze the Bank Loan Application records. Group the applications by Loan Status and display the count of applications in each status, such as Pending, Approved, Rejected, or Manager Review. Use the existing loan application data source. Set the X-axis to Loan Status and the Y-axis to the count of applications. Give the chart the title "Loan Applications by Status".
Added Status Bar Chart
Added a bar chart titled "Loan Applications by Status" to the Loan Application Dashboard page. The chart displays the count of loan applications grouped by Record Status.
Try instructing Zia to 'Create a form to collect customer details'

Result:

The experiment successfully demonstrated the integration of AI-driven analytics using Zia in Zoho Creator, proving its efficiency in delivering automated business intelligence and natural language data exploration without manual script coding.
